Profile

Thirteen years of professional experience, and one habit underneath most of it: understand a system well enough to see its structure, then encode that structure once so the manual work — or the vigilance — never has to happen again. Hand-assembled releases became an automated delivery system; a one-off cloud migration also produced the reusable template for every migration after it; recurring engineering work became a set of agents that now do it.

Five of those years as a consultant for Porsche, BMW Financial Services, Volkswagen Financial Services, Krones, a European asset manager and a public-sector client in healthcare. Full stack, from Java and Jakarta EE backends to React, Angular, Vue and TypeScript front ends, with AWS, Terraform, Kubernetes and CI/CD throughout. Takes requirements directly from business departments and turns them into process design, estimates and documentation; has carried responsibility for junior developers on both the consultancy and the client side. AWS Certified Solutions Architect–Associate. Native Italian, fluent German and English.

Interested in work with end-to-end ownership of a system: where whoever designs it stays responsible for it, and where making the right thing automatic counts as part of the job rather than something done in the gaps. The same instinct runs off the clock — see PlayCryptoWithAI below.

Technical Skills

Backend / JVM	Java, Spring, Spring Boot, Jakarta EE (Java EE / J2EE), Hibernate, WildFly, Payara
AI-assisted engineering	GitHub Copilot, Claude, agentic development workflows, prompt patterns, tool-assisted refactoring and test generation, enabling a team to work this way
Frontend	TypeScript, React, Angular, RxJS, Vue.js, Pinia, JSF 2.0, Vaadin, Material UI
Node / APIs	NestJS, Express, Prisma, REST, backend-for-frontend architectures
Cloud & IaC	AWS (Lambda, DynamoDB, SNS, SQS, EKS, Fargate, Cognito, VPC, Route 53, CodePipeline, CodeArtifact), Terraform, AWS CDK, Azure AD / SAML
Containers & Ops	Docker, Kubernetes, Linux, nginx
CI/CD & artifacts	GitLab CI, Jenkins, Bamboo, Concourse CI, GitHub, Nexus, JFrog Artifactory, AWS CodeArtifact
Data & messaging	PostgreSQL, Oracle, MS SQL Server, DynamoDB, Kafka, SQL
Testing & quality	JUnit, Jest, Cypress, Supertest, Cucumber, Selenium, SonarQube, K6 load testing
Business platforms	BSI CRM (BSI Masterclass)
Leadership & ways of working	technical responsibility for teams of 2–3 developers, mentoring juniors, requirements workshops with business departments, effort estimation, release planning, DevOps, DevSecOps, Scrum, 2nd-level support

Professional Experience

2024 – present

msg for banking AG — Ismaning

Senior IT Consultant

Consulting arm of the msg group for banks and financial services providers.

08/2025 – present

Objections and damages case platform · public-sector client in healthcare, not named

Senior IT Consultant / Senior Developer · team of 4: an architect, myself and two junior developers

Replacing long-established Excel-based processes with a web application for a public-sector client in the German healthcare system. The system handles objection procedures (Widerspruchsverfahren) and claims for sonstige Schäden arising out of settlement. Spring Boot backend, Vue 3 front end with Pinia, the whole system running on Kubernetes. AI-assisted engineering is a regular part of the work here: GitHub Copilot in the daily development loop, self-built agentic workflows for recurring engineering work, and hands-on coaching of the two junior developers on both.

STACK `Java` `Spring Boot` `Vue 3` `Pinia` `TypeScript` `Kubernetes` `GitHub Copilot`

06/2025 – 07/2025

BSI CRM customer platforms · BSI, end customer Techem

Senior IT Consultant / Senior Developer · two-person teams

Two customer platforms built on BSI's proprietary CRM base software, both administering operations at European scale. Kept them running and current in two-person teams: maintenance, dependency and platform updates and feature work across the Spring and Oracle backends and the Angular front end.

STACK `Java` `Spring` `Oracle` `Angular` `BSI CRM`

01/2025 – 05/2025

Digital euro showcase application · Pioneer Investments

Senior IT Consultant / Senior Developer · team of 6

Built a synchronised digital payment application and a companion mobile app, including a tested client for the ECB REST APIs. Ran requirements gathering with the business department, owned process design and documentation for both client and developers, and carried team responsibility for two junior developers.

STACK `TypeScript` `React` `Material UI` `Express` `Prisma` `PostgreSQL` `Docker` `Jest` `Cypress` `REST`

05/2024 – 07/2024 **GitLab runner migration to AWS** · Internal, msg for banking
Senior Developer · sole engineer
Migrated the company's GitLab build agents into AWS against a fixed cut-over date, with several teams depending on them throughout. Aligned the setup with corporate security and compliance standards and delivered a reusable Terraform template for future runners.
STACK `Terraform` `EKS` `VPC` `VPN` `Route 53` `AWS Cloud Services`

01/2024 – present **IFRS 9 regulatory platform** · Porsche Bank
Senior Developer · team of 3
A platform my department looks after, worked on alongside the other projects whenever it needs hands. Maintenance and modernisation of a long-lived codebase: refactoring, security updates, replacement of outdated dependencies and cross-OS compatibility work. Owns the pipelines and DevOps processes, including their migration into the AWS cloud, alongside feature development and customer change requests.
STACK `Java EE` `Hibernate` `WildFly` `JUnit` `GitLab CI` `SonarQube`

06/2021 – 2023 **msgGillardonBSM AG** — Ismaning
`IT Consultant`
Banking and financial services consultancy of the msg group; merged into msg for banking AG.

01/2023 – 12/2023 **Microservice platform for financing products** · Volkswagen Financial Services
IT Consultant / Senior Developer · team of 6
Operation and deployment of more than 60 AWS backend microservices integrating and calculating financial products inside the group cloud ecosystem. Migrated legacy services, designed and built new ones, advised the business department and produced effort estimates.
STACK `TypeScript` `Java` `NestJS` `Express` `Concourse CI on AWS Fargate` `containers` `Supertest` `Jest` `K6 load testing` `BFF framework`

04/2022 – 12/2022 **HEIDI — leasing and financing sales portal** · BMW Financial Services
Developer · team of 11
Online portal for the sale of leasing and financing products — the same platform whose replatforming I had worked on in 2018/19, rejoined four years later as a developer. Feature development and customer change requests, production log analysis, code quality work and maintenance of the Jenkins pipelines and DevOps processes.
STACK `Java EE` `JSF 2.0` `Hibernate` `Payara` `JUnit` `Jenkins` `SonarQube`

06/2021 – 03/2022 **Mobih — mobile maintenance application** · Porsche AG
Senior Developer · team of 6
Replaced paper-based maintenance processes in automobile production with an iOS application designed around the existing analogue workflow. Gathered requirements with the business department, built features and tests, ran cloud deployment through infrastructure-as-code, integrated on-premise SAP systems as the backend, and mentored junior developers on the client side.
STACK `TypeScript` `Angular` `RxJS` `Jest` `Cypress` `AWS` `CDK` `Bamboo` `GitLab CI` `SonarQube`

01/2020 – 05/2021 **Device Insight GmbH (now KUKA Digital)** — Munich
`Software Engineer`
IoT and analytics provider for industrial customers.

07/2020 – 05/2021 **Energy monitoring and reporting platform** · Schwarz IT KG
Software Engineer · team of 2
Maintenance and feature development of a system for control, monitoring and report generation across power installations in retail stores and warehouses. Direct customer contact; helped introduce Scrum and refine the product backlog.
STACK `Java` `Spring` `Hibernate` `JUnit` `Cucumber` `GitLab CI` `Jira`

01/2020 – 06/2020 **Remote service platform for production lines** · Krones AG
Software Engineer · team of 2
Remote-access solution for bottling and filling lines via Cisco devices. Integrated customer logins with Azure AD using SAML and AWS Cognito, implemented features and resolved defects, with direct customer contact throughout.
STACK `Java` `Spring` `Hibernate` `JUnit` `Cucumber` `Azure AD / SAML` `AWS Cognito` `GitLab CI`

2018 – 2019 **msgGillardon AG**
`DevOps Werkstudent`
Banking software and regulatory solutions for financial institutions.

11/2018 – 12/2019 **HEIDI replatforming** · BMW Financial Services
Working student · test, defect management and development
Rebuild of a pre-2000 leasing and financing platform on a current stack. Planned and wrote test cases, implemented the fixes coming out of each test phase, and ran test and defect management in HP ALM. Developed and maintained Java EE applications on Oracle with Hibernate, managed schema evolution with Flyway and deployment on Payara Server, and built and maintained Jenkins pipelines.
STACK `Java EE` `JSF 2.0` `Oracle` `Hibernate` `Flyway` `Payara` `Jenkins` `HP ALM` `Python`

2013 – 2018

3Points Software GmbH

Senior Application Developer · Junior Application Developer

Software house for licence and rights management in the entertainment industry.

01/2019 – 04/2020

Licence sales web portal · Red Arrow Systems International

Developer · team of 4 · alongside the working-student role at msgGillardon

Web portal for fast lookup of available licences at trade fairs, with personalised flyer generation for visitors. Owned conception, realisation, deployment and ongoing maintenance of the portal.

STACK `Java EE` `Hibernate` `Payara` `Vue.js` `Jira` `Bitbucket` `Bamboo` `Windows Server administration`

12/2016 – 07/2017

Release automation · Internal, 3Points

Developer

Releases were assembled by hand from features and configs, which produced recurring errors and hotfix deliveries. Designed and implemented an automated delivery system in Bamboo and Jira that branched, recombined and packaged releases on its own, cutting manual release work and the hotfixes that followed from it.

STACK `Bamboo configuration as code (Groovy DSL)` `Jira` `Linux shell` `PowerShell`

08/2013 – 12/2018

Broadcasting rights management system · Red Arrow Systems International

Junior to Senior Developer · team of 2

Ground-up rebuild of an ageing system for managing international film and television broadcasting rights on a modern stack, including database maintenance and data migration. Built the framework and the revenue and invoicing modules, the latter with an SAP interface and archiving. Release planning and implementation, direct customer contact and troubleshooting of live systems.

STACK `Delphi XE` `MS SQL Server` `Windows Server 2012` `FastReport` `DevExpress` `Jira` `Git`

Selected Personal Work

2026 – present

PlayCryptoWithAI · agentic engineering system

`github.com/colla69/PlayCryptoWithAI`

Sole author

A multi-strategy trading bot for Binance spot markets, running unattended in Docker. The engineering system around it is the real subject: eleven specialised Claude agents — risk, security, backtest, pre-commit and project review alongside strategy design, development and testing — reviewers deliberately read-only, the highest-stakes ones on the strongest model, their rules written from real production incidents so each failure became an invariant enforced on every later change. Published performance figures were deliberately replaced with lower, fully reproducible ones.

STACK `Node.js` `Docker` `Binance API` `Claude agents / skills / rule files` `Vitest`

Education & Training

2011 – 2013

Ausbildung: Fachinformatiker für Anwendungsentwicklung (IHK)

3Points Software GmbH · Final grade 71/100

2011

Diploma di Liceo Scientifico

Liceo Scientifico “Voltaire” · Final grade 70/100

Certifications

AWS Certified Solutions Architect – Associate

first certified 12/2022, recertified 04/2026, valid until 04/2029

Languages

Italian native speaker

German fluent, spoken and written. Part of secondary school and the vocational training in Germany; TestDaF, Goethe-Institut Munich

English fluent, spoken and written; professional working language
